

AXIS A9161 Network I/O Relay Module

Cost-efficient intelligent module

AXIS A9161 Network I/O Relay Module has 6 configurable I/Os with supervised inputs and a relay. The module reacts on inputs, such as signals from PIR motion detectors or switches, to trigger actions. Its open platform enables a high level of integration with AXIS A1001 Network Door Controller, network cameras, and other facility systems. AXIS A9161 also works standalone. Supplying power to I/O devices, it can extend the functionality of Axis products where additional I/Os or relays are needed. Its convenient size and enclosure makes installation easy and flexible.

- > **6 I/Os and 1 form C relays**
- > **12 and 24 V DC output/input or PoE**
- > **Based on Axis open platforms - VAPIX and ACAP**
- > **Used with AXIS Camera Station or third-party software**
